

TECHLIFT M4

Tech Lift M4 is based on 4 telescopic lifting columns which gives the lift a clean and stylish appearance, the operation is almost maintenance-free and has a very quiet drive. Tech Lift M4 lifts up to 350 kg at a speed of about 35mm / second, and a height of 1500mm. The lift is as standard equipped with a battery backup for use during power outage. Doors and sides are covered with colored polycarbonate glass for a luxury look, low weight a construction made entirely of aluminum 150 kg. And minimum height of only 40mm. Incredibly stable due to rail control all the way to the upper plane, the lift cannot move sideways. Simple installation and easy to relocated. The lift can be used both indoors and outdoors, the lifting columns are tested down to -30 degrees. Tech Lift M4 fits equally well in private and public environments.
